

Stranded and braided copper litz wire **CLI-S 100/20**

Advantages

Insulating varnish basis polyurethane, mod.

Grade 1

TJ min. 155 °C

Solderable

Applications

Braided insulated radio frequency copper litz wire for the production of coils and windings in the radio frequency range and for general laboratory needs. The HF-litz wire consists of twisted, stranded wires with a common textile wound. Please consider the relevant standards.
