Radio interference filter, three-phase

HFD 510-400/80 - no longer available

Advantages

For the highest requirements

Two-stage filter concept

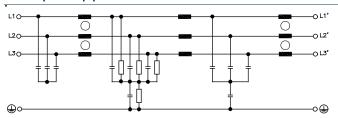

Efficient filter effect against line-bound interference emissions

Increase in the interference immunity of the connected consumer

Applications

Leakage current measured against the maximum permissible input voltage fluctuation in accordance with IEC 38 $\pm10~\%.$

Sample application

Standards

Radio interference suppression filter to DIN EN 60939-2

Approvals

Radio interference filter, three-phase **HFD 510-400/80 - no longer available**
