

Short circuit proof PCB transformer,
safety isolating transformer

DATA SHEET

VB 2,3/2/6

Type number

Order number	VB 2,3/2/6
Series	VB
Core size	EI 30/18

Technical data

Tapping	Voltage [V]	Current [A]	Fuse
Input 1	230		
Output 1	6	0.192	
Output 2	6	0.192	

General

Power	2.3 VA	Duty Cycle	100 %
Phases	1	No-Load Losses	0.9 W
Frequency range	50 up to 60 Hz	Wire material	Copper

Operating conditions

General

Short circuit proof	inherently short-circuit proof	Switching group	lii0
Cooling type	AN		

Cited date	19.12.2024
Part number	VB 2,3/2/6
Page	1

perfecting power

Environment

Max. installation height	2,000 m	Transport temperature	-20 up to 85 °C
Ambient temperature	-20 up to 60 °C (UL: max. 40 °C)	EN Insulation class	B (130°C)
Storage temperature	-20 up to 85 °C	UL Insulation class	class 105

Protection & Safety

Protection type	IP 00	Degree of contamination	1
Protection class (prepared)	II	Overvoltage category	III

Mechanical data

Electrical Connections

Input terminal	Pin	Output terminal	Pin
----------------	-----	-----------------	-----

Size & Weight

Width	32.8 mm	Weight	0.111 kg
Height	29.8 mm	Core weight	0.083 kg
Depth	27.8 mm	Copper weight	0.02 kg

Dimensions

Derating - Installation height

Standards and approvals

RoHS compliant

EN 61558-2-6
2009

CE compliant

VDE Approval

Approval cURus -
Recognized
UL 5085-1/-2;
CSA 22.2 E103521

Notes

Technical specifications are typical,
they can vary due to material and production tolerances.
